

BAO ZI JUN, ALEX

PERSONAL INFORMATION

Gender: Male
Email: zijun.bao@outlook.com
Phone Number: 5936 6684
Available Period: 1 Jan. 2027 – 1 Sep. 2027 (faculty-approved leave of absence)
Visa Status: Student Visa with No Objection Letter

SUMMARY

- Engineering student who turns operational pain points into deployed systems, from analysis to delivery
- English (professional working proficiency); Mandarin (native); Cantonese (limited working proficiency)
- Skilled in Excel, Power BI, Power Automate, Power Apps, SAP, Claude Code, Lark (Feishu), FlexSim
- Track and deploy the right AI tooling for each business problem; data analysis in Python and SQL

EDUCATION

The University of Hong Kong

Degree: Bachelor of Engineering 1 Sep. 2023 – 30 Jun. 2028
Major: Data and Systems Engineering (formerly IELM), Major GPA: 3.73/4.3
Major courses: Data Driven Optimization, System Modeling & Simulation, Supply Chain Management
Awards: Dean's Honours List (2024–2025, 2025–2026)

INTERNSHIPS

The Hong Kong and China Gas Company Limited (Towngas)

Industrial Trainee, Hong Kong 22 Jun. 2026 – 31 Dec 2026

- Digital transformation for Insurance and Transport under Corporate Supplies and Administration Dept.
- Digitized 14 years of insurance records into a policy-linked database with dashboards and a RAG agent
- Turned raw GPS data into quarterly utilization index for 548 vehicles in Python, guiding fleet allocation
- Built a fleet management app with change requests and admin approval, replacing manual logbook entry
- Chained LLMs into a workflow drafting formatted meeting minutes, cutting 2 hours of work to 1 minute

Intelli Global Corporation (IGC)

Product Intern, Hong Kong 2 Jun. 2025 – 29 Aug. 2025

- IGC develops BuildingOS, a smart building management platform, for property and facility operators
- Authored PRDs for The Henderson's Digital Twin, specifying features and sourcing IoT/Gov data APIs
- Classified 1,000+ documents via Python into 6 RAG knowledge bases, then tuned and tested retrieval
- Formulated an energy-saving calculation model to prove BuildingOS's ESG value for the HKICT Awards
- Developed and presented IoT proposals for public housing estates to the Hong Kong Housing Authority

PROJECTS

NeoChain Co., Limited

Co-Founder, Hong Kong 4 Jul. 2025 – 1 Jun. 2026

- NeoChain provides industrial digital transformation consulting for manufacturing & logistics SMEs
- Identified the gap on-site at an auto parts factory: no WMS in their ERP, inventory tracked on paper
- Led a 7-person team to scope and build a WMS MVP, authoring the PRD and full system architecture
- Secured client funding for barcode hardware and ran an on-site pilot to test the system in production

Cathay Hackathon 2025

Team Lead, Hong Kong 20 Sep. 2025 – 16 Nov. 2025

- Cathay Pacific's open innovation hackathon on air cargo and aviation operations challenges
- Researched MILP algorithms to compute center-of-gravity (CG) balanced ULD layouts for a Boeing 747
- Built an interactive interface for users to adjust ULD layouts, with real-time CG and load scoring feedback
- Top 50 Finalist out of 1,500+ teams; built and pitched an MVP in a 24-hour onsite final at Cathay City
